---

---

## Objectives of Today's Session

- Summarize research highlights on motivation and (a) self-efficacy, (b) goal setting, and (c) the learning environment
- Provide an opportunity for participants to discuss the research highlights and implications for their practice, and
- Provide an opportunity for participants to share strategies they use to enhance learners' motivation.

### Three Main Themes from the Report

Self-efficacy

Goal Setting

The Learning Environment

LINCS

7

### Definition of Terms: Motivation and Persistence

**Motivation:** *The reasons—including desire or willingness—one has for acting or behaving in a particular way*

- Intrinsic vs. extrinsic motivation
  - Intrinsic motivation is the willingness to undertake a behavior for its own sake, enjoyment or interest.
  - External motivation is the willingness to undertake a behavior in order to receive some type of reward or approval that comes from others.

**Persistence:** In adult literacy, persistence as defined as...

*...adults staying in programs for as long as they can, engaging in self-directed study or distance education when they must stop attending services, and returning to program services as soon as the demands of their lives allow.*

Comings, J.P. (2007). Persistence: Helping Adult Education Students Reach Their Goals. Chapter 2 in J. Comings, B. Garner, and C. Smith (eds), Review of Adult Learning and Literacy, Volume 7, p. 24

LINCS

8

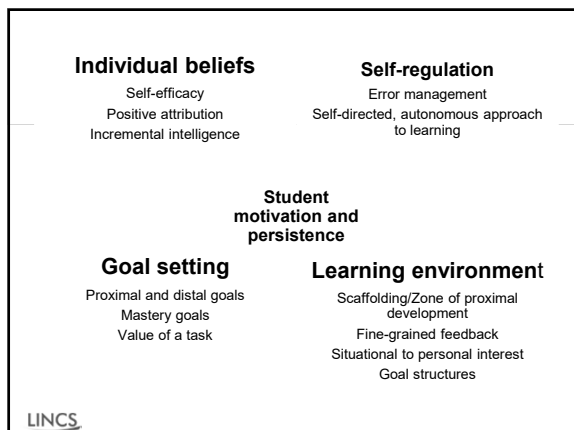

### Factors That Support or Constrain Persistence in Learning

FIGURE 5-1 Factors that support or constrain persistence in learning.

LINCS

9

---

---

---

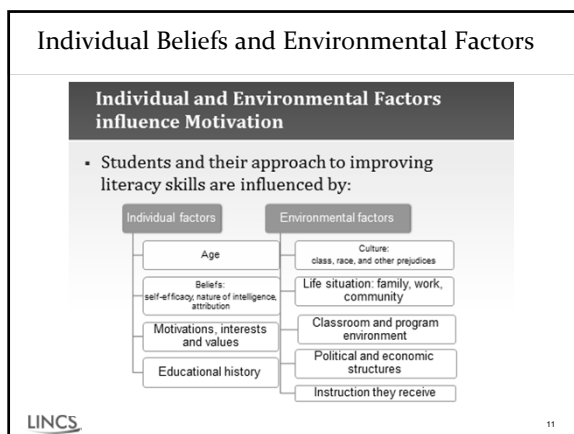

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

### Key Terms: What Is Self-efficacy?

**Self-efficacy is the belief about whether you can be successful at a particular task that you attempt.**

**High or strong self-efficacy is the belief that you will be successful.**

#### Similar concepts:

- *Expectancy belief*: the belief that your effort will result in you attaining your goal in a specific area
- *Self-concept of ability*: beliefs about your ability in a specific area
- Literacy examples of self-efficacy:
  - Belief that you can succeed at writing college papers.
  - Belief that you can understand letters sent home by a child's teacher.
  - Belief that you can pass the high school equivalency test.

LINCS

13

---

---

---

---

---

---

---

---

### Activity: Self-Efficacy

- Think of a task you've never done but feel you *could successfully accomplish*...why do you feel you could be successful?
- Think of a task or accomplishment that you *aren't sure you could successfully accomplish*...why?
- Think of a task or accomplishment that you feel fairly certain *you would not successfully accomplish*...why?

LINCS

14

---

---

---

---

---

---

---

---

### Research Findings: Self-Efficacy

- Self-efficacy related to literacy is associated with positive outcomes in literacy, while general self-esteem doesn't seem related to particular outcomes.
- Self-efficacy can be "adaptive" or malleable.
- Students' sense of self efficacy may be related to...
  - ...An incremental view of intelligence.
  - ...Stronger sense of self-control and autonomy, coupled with intrinsic motivation
  - ...The ways students attribute success or failure.

LINCS

15

---

---

---

---

---

---

---

---

### Why Is Self-efficacy Important?

- When learners expect to succeed, they are more likely to put forth the effort and persistence needed to perform well.
- More confident students are likely to be more cognitively engaged in learning and thinking than students who doubt their capabilities.
- Self-efficacy is a strong predictor of many educational, physical, and mental health outcomes and has been associated with better literacy skills.
- Self-efficacy in a particular domain, such as education or health, relates positively to outcomes in that domain.

LINCS

16

---

---

---

---

---

---

---

### Activity: Self-efficacy

- Individually, review the research findings and implications for practice for self-efficacy on the self-assessment handout.
- In pairs, choose one self-efficacy finding and discuss specific strategies that you have used and/or identify strategies would you like to use in your classroom/program.
- We'll check in with the large group on what items are of most interest.

LINCS

17

---

---

---

---

---

---

---

## Goal Setting

LINCS

18

---

---

---

---

---

---

---

### Goal Setting: Key Terms

- Short-term and long-term goals
- Goal orientation theory
  - **Mastery goal**
    - Performance-approach goal
    - Performance-avoidance goal
- *Goal structures*: mastery goal or performance goal; how goals are emphasized in classrooms; how students perceive the way goals are emphasized

LINCS

19

---

---

---

---

---

---

---

### Research Findings: Goals and Motivation

- Goal structures (emphasis of mastery vs. performance goals) influence the types of goals that students adopt
  - If **mastering a new ability for the sake of learning** is emphasized (e.g., "it will help in the future if you know how to..."), students will adopt **mastery goals**;
  - When **performance is emphasized** (e.g., "the best students make the Dean's list"), students will adopt **performance-related goals**.

LINCS

20

---

---

---

---

---

---

---

### Research Findings: Goal Setting

- Helping students set **short-term goals related to literacy skills**, and supporting them to be successful at these goals, increases self-efficacy and persistence.
- Goal structures (emphasis of mastery vs. performance goals) influence the types of goals that students adopt.
- According to research...
  - **mastery goals lead to better outcomes.**
  - performance-avoidance goals lead to poorer outcomes
  - performance-approach goals have mixed outcomes

LINCS

21

---

---

---

---

---

---

---

### Activity: Goal Setting

- Think of one goal you have for the future.
- Think of the steps you need to do to reach that goal.
- Reflect – What parallels does this activity have in working with students in setting goals?

LINCS

22

---

---

---

---

---

---

---

### Characteristics of Those with Mastery Goals

- Prefer challenging tasks
- Focus on task mastery and improving competence
- Believe that learning occurs at different rates
- Base satisfaction on effort exerted
- Increase efforts if faced with negative outcomes: "the harder it is, the more I need to try"
- Attribute failure to lack of effort
- Engage in extensive self-monitoring

LINCS

23

---

---

---

---

---

---

---

### Activity: Goal Setting

- Individually, review the research findings and implications for practice for goal setting on the self-assessment handout.
- In pairs, choose one goal setting finding and discuss specific strategies that you have used and/or identify strategies would you like to use in your classroom/program.
- We'll check in with the large group on what items are of most interest.

# The Learning Environment

LINCS

25

---

---

---

---

---

---

---

---

## The Learning Environment: Key Terms

- Scaffolding/Zone of proximal development
- Fine-grained feedback
- Situational to personal interest
- Goal structures

LINCS

26

---

---

---

---

---

---

---

---

## Vygotsky's Zone of Proximal Development

LINCS

Adapted from Hill & Crevola (unpublished)  
State of Victoria Department of Education and Early Childhood Development, 2007

27

---

---

---

---

---

---

---

---

### Providing Feedback

**Feedback helps learners fine-tune their knowledge, skills, and strategies, affecting learning in a number of ways that are well documented.**

- **Accurate and timely feedback helps learning.**
- **Provide fine-grained feedback**—feedback detailed and specific to the task at hand—with hints that prompt learners to generate information or execute a behavior or skill.
- **Qualitative feedback** is better for learning than test scores and error flagging.

LINCS

29

---

---

---

---

---

---

---

### Using and Inspiring Learners' Interests

**Adult learners are likely to put forth more effort and stay engaged in tasks they find interesting.**

- Researchers have made a useful distinction between **personal interest** and **situational interest**, and both types have implications for motivating adult learners.
  - **Personal interest** is the interest that learners bring into classrooms; it represents their longstanding preferences.
  - **Situational interest** is inspired by a particular event or characteristic of an experience, such as the features of a text or task.

LINCS

29

---

---

---

---

---

---

---

### The Learning Environment: Research Findings

- Motivation, persistence, engagement and goal attainment are influenced both by individual characteristics, such as self-efficacy, **and** the environment.
- People regulate their learning and allocate energy to tasks that are neither too easy nor too hard.
- Students' motivation is increased when they have some autonomy and self-direction about the learning tasks they need to do.
- Students need feedback in order to assess their progress on tasks, a part of self-regulation of learning.

LINCS

30

---

---

---

---

---

---

---

### The Learning Environment: Research Findings

- Students' motivation is increased when they value a task because it is part of the process of accomplishing their goals. (Intrinsic)
- Students' motivation is increased when they use error management and attribute success positively—to effort and strategies rather than to negative internal factors (e.g., "I'm not smart.").
- Students can learn self-regulation strategies from observing teachers and other students using them.
- Students are de-motivated when they feel that structures are pre-determined and too controlling of them.

LINCS

31

---

---

---

---

---

---

---

### Activity: The Learning Environment

- Individually, review the research findings and implications for practice for the learning environment on the self-assessment handout.
- In pairs, choose one learning environment finding and discuss specific strategies that you have used and/or identify strategies would you like to use in your classroom/program.
- We'll check in with the large group on what items are of most interest.

LINCS

32

---

---

---

---

---

---

---

#### Individual beliefs

Self-efficacy  
Positive attribution  
Incremental intelligence

#### Self-regulation

Error management  
Self-directed, autonomous approach  
to learning

#### Student motivation and persistence

#### Goal setting

Proximal and distal goals  
Mastery goals  
Value of a task

#### Learning environment

Scaffolding/Zone of proximal  
development  
Fine-grained feedback  
Situational to personal interest  
Goal structures

## What is LINCS?

**WHAT IS LINCS?**

LINCS, the Literacy Information and Communications System, is an initiative of the U.S. Department of Education's Office of Career, Technical, and Adult Education (OCTAE). LINCS aims to expand evidence-based practice in the field of adult education. The LINCS website provides high-quality, on-demand educational opportunities to practitioners of adult education, so those practitioners can help adult learners successfully transition to postsecondary education and 21st century jobs.

**COMMUNITY OF PRACTICE**

**LEARNING PORTAL**

**RESOURCE COLLECTION**

**LEARNER CENTER**

**LINCS FOR STATES**

36

---

---

---

---

---

---

---

---

### How Can LINCS Help You?

- A **Resource Collection** containing high-quality, evidence-based materials in 16 topic areas critical to the field
- A **Learner Center** that connects adult learners to free online resources to reach life goals
- An online **Community of Practice** where you can share and collaborate with your peers
- A **Learning Portal** where you can engage in self-paced and facilitated professional development courses
- A **Professional Development Center** that provides evidenced-based professional development activities

LINCS

37

---

---

---

---

---

---

---
